

## APPEL A PROJET EMERGENCE

### GUIDE DE CANDIDATURE :

## General Informations

### Work position of the project coordinator

## Project overview

- Project title \*Project title in French \*Project acronym \*Generic title
- Abstract of the project, *3000 Characters maximum*
- English and french lay summary, please simplify the content as much as possible, it is a project abstract that should be accessible to non-scientists, *3000 Characters maximum each*

## Scientific part

### Background, objectives & Scientific and technical description

- Put in perspective the state of the art (national and international) and explain the relevance of the project's scientific rationale with respect to current knowledge & describe the overall scientific rationale of the project and its innovative character. Focus on explaining the disruptive and emergent aspects of the project, *10 000 Characters maximum*.
- Describe the scientific challenge addressed by the project, *5000 Characters maximum*
- Describe the main working hypothesis & list the main objectives and how these objectives will be achieved, *5000 Characters maximum*
- Substantiate the choice of methodology, technology and eventually the research infrastructures to be used, *5000 Characters maximum*
- Evaluate potential the impact of this project on the emergence of new research topics and/or technologies on RMDs, *5000 Characters maximum*

### Laboratory strategy

- Explain how the project fits into a larger research program, *5000 Characters maximum*
- Describe how this project is consistent with the overall research strategy of the principal investigator's research unit, *5000 Characters maximum*
- Explain how the project topic aligns with the Fondation's research strategy and priorities, *3000 Characters maximum*

## Project Organisation and Management

### Participants and % of time on the project

#### Management framework

- Describe the scientific expertise of the principal investigator and his ability to manage and coordinate this project, *3000 Characters maximum*
- Briefly describe the role and tasks performed by each person involved in the project (technicians, bioinformatician, PhD student, postdoc), *5000 Characters maximum*

- Detail the project management methodology: organization; performance monitoring indicators; shared resources management, valorization methodology; management of the expected risks 5000 Characters left, *5000 Characters maximum*
- Insert an attached piece:  
Outline the project workflow : tasks, deliverables, RACI (attribution of project tasks among the team), Budget (precise the budget categories), timelines and the expected results (a chart must be attached)

### Expected outcomes of the project

- Describe the expected scientific results and outcomes and their contribution for further development of the project, *5000 Characters maximum*
- Describe how the expected results could attract larger scale funding for further development of the project, *5000 Characters maximum*
- Indicate whether the project will contribute to the introduction of a new research topic on RMDs within the research unit, *5000 Characters maximum*
- Detail the communication and results valorization strategy *5000 Characters maximum*

### Suggestions of reviewers / CV and references
