Intro / Presentation of the Cordeliers Research Center

The Centre de Recherche des Cordeliers (CRC) is a research center of excellence located in the center of Paris. CRC develops fundamental, translational and clinical research in the field of biology and health.

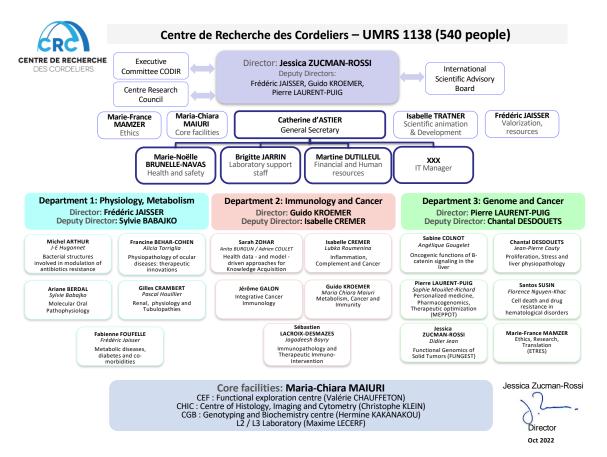

CRC's research projects are multidisciplinary, mainly in the fields of oncology, immunology, the study of metabolism and the major physiological functions of the body in close collaboration with the University-Hospital Group Paris Centre and the network of 40 hospitals of the Assistance Publique-Hôpitaux de Paris (AP-HP).

In January 2022, CRC has more than 500 people working in 16 teams in three departments. High-performance tools for imaging, genomics, cell culture, functional exploration, and bioinformatics are available to researchers through the Center's technological core facilities

CRC is headed by Professor Jessica Zucman-Rossi, a specialist in oncology and tumor genomics. The Cordeliers Research Centre is administrated by Inserm, Sorbonne University, and Université Paris Cité.
